EDUARDO DE SOUZA MARQUES

AI Chat & Evaluation Specialist | Prompt Red Teaming & Model Alignment

Brazil (100% Remote / Asynchronous) contact@pixelproads.com github.com/edusouzamarques

linkedin.com/in/edusouzamarques

PROFESSIONAL SUMMARY

Detail-oriented Bilingual AI Evaluation Specialist combining native Brazilian Portuguese fluency with professional working English. Extensive experience evaluating frontier LLMs, grading multi-turn dialogue across the HHH framework (Helpfulness, Harmlessness, Honesty), and authoring structured, evidence-backed rationales in English. Background spanning 13.5 years of rigorous investigative analysis, compliance auditing, and open-source tooling for AI governance and guardrails. Highly autonomous in asynchronous remote workflows with a disciplined approach to stress-testing AI assistants.

CORE COMPETENCIES

LLM Evaluation & RLHF: Multi-turn dialogue testing, pairwise ranking, criteria scoring.

Fact-Checking & Logic: Source verification, hallucination isolation, consistency checks.

Linguistic Precision: Native PT-BR idiomatic nuance, syntax, and formal tone adaptation.

Adversarial Red Teaming: Safety probing, prompt injection boundary testing, bias detection.

Constraint Adherence: Strict negative constraint verification, structured output formatting.

Asynchronous Delivery: Clear written English rationales, Markdown documentation, Git workflows.

RELEVANT EXPERIENCE

Autonomous AI Systems & Workflow Engineer • Pixel Pro Ads / Independent — 2024 – Present

- Evaluated hundreds of multi-turn conversational prompts across frontier LLMs, rating outputs on Helpfulness, Harmlessness, and Honesty (HHH framework) and strict instruction-following.
- Conducted in-depth pairwise evaluations on Portuguese and English outputs, identifying subtle hallucinations, reasoning errors, and translation artifacts.
- Authored 14 open-source Python libraries for AI safety, runtime guardrails, and deterministic evaluation (including automated test suites with 3,500+ tests).
- Executed adversarial red-teaming prompts to stress-test model safety boundaries, jailbreak vulnerabilities, and refusal calibration.

Investigative & Operations Specialist • Polícia Militar de Minas Gerais (PMMG) — 2006 – 2019 (13.5 yrs)

- Conducted analytical investigations requiring evidence verification, anomaly detection, and adherence to strict operational protocols.
- Synthesized ambiguous multi-source data into objective, factual reports under strict evidentiary standards with zero tolerance for speculation.
- Applied systematic critical thinking and objective analysis in high-consequence environments, identifying discrepancies and protocol non-compliance.

TECHNICAL CERTIFICATIONS & CONTINUING EDUCATION

- **Google Cybersecurity Professional Certificate** – Google / Coursera (Foundations of Cybersecurity, NIST CSF, Threat Analysis)
- **Cisco Networking Academy** – Python Essentials 1 (PCEP Track) • Linux Operating System Fundamentals
- **CompTIA Security+ (SY0-701) & GRC Standards** – In Progress (Identity & Access Management, Cryptography, Security Architecture)

EDUCATION

Higher Technology Degree in International Trade (Comércio Exterior) — UNINTER • Curitiba, Brazil

Technical Degree in Public Safety (CTSP) — Polícia Militar de Minas Gerais (PMMG) • Brazil

LANGUAGES

Portuguese: Native (C2) – Master-level grammar, idiomatic nuance, copywriting • **English:** Professional Working Proficiency (B2/C1) – Fluent in analytical writing, technical documentation & prompt evaluation delivery.
