Re: Application for **Fraud Operations Intern (Shopper Risk Operations)**

Dear Sezzle Hiring Team,

I am writing to express my strong enthusiasm for the **Fraud Operations Intern** position at Sezzle. As a mission-driven fintech revolutionizing digital commerce and payments, Sezzle requires risk analysts who combine sharp investigative instinct, high emotional intelligence, and relentlessly high standards. Having dedicated 13.5 years to investigative analysis and public safety operations with the State Police (PMMG), followed by directing consular compliance and international regulatory documentation, I bring a battle-tested track record in anomaly detection, fact-checking, and fraud prevention with zero tolerance for speculation.

What excites me about Sezzle's Shopper Risk Operations is the opportunity to protect merchant and consumer trust in a fast-paced fintech environment. Here is how my background translates to immediate impact for Sezzle:

- **Evidentiary Rigor & Anomaly Detection:** Conducted hundreds of complex investigations requiring strict chain-of-custody protocols, cross-referencing multi-source records, detecting counterfeit documents, and uncovering fraudulent patterns.
- **Cybersecurity & Risk Foundations:** Google Cybersecurity Professional certified (Foundations, NIST CSF Risk Management, and Network Security) alongside TryHackMe hands-on defense labs, providing solid understanding of account takeovers (ATO), payment vectors, and social engineering.
- **AI & Technology Leverage:** Extensive daily proficiency using AI tools (Claude, ChatGPT, Python scripting) to automate analytical tasks, synthesize queue data, and accelerate resolution speed while maintaining audit-level precision.
- **Bilingual Communication:** Native command of Portuguese combined with professional English fluency (B2/C1) for clear written case rationales, cross-functional collaboration, and decision logging.

Sezzle's core values—particularly *having relentlessly high standards* and *having the backbone to disagree, then commit*—reflect my own operational ethos. In public safety and cross-border compliance, allowing defects to pass down the line carries severe consequences; I ensure anomalies are identified at the root and resolved definitively.

I am eager to contribute this discipline, analytical rigor, and passion for fintech security to Sezzle's Shopper Risk team. Thank you for your time and consideration, and I look forward to speaking with you.

Sincerely,

Eduardo de Souza Marques
